

## Sunrises On Wild Rose Country

Solar industry activity has been increasing rapidly in the Alberta market this year, aided by the continued improved costs in solar systems - in line with cost decreases seen globally, and the opportunity brought by favorable policy conditions brought at a provincial level.

**Efficiency Alberta** incentives for residential and commercial systems, which are up to \$500,000 for commercial systems or 25% of eligible system costs.

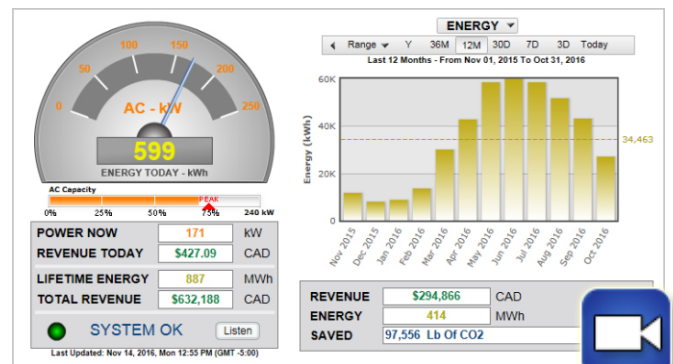

### Solar Incentive Levels in Alberta

	RESIDENTIAL (\$/WATT)	COMMERCIAL OR NON-PROFIT (\$/WATT)
\$/Watt (DC)	\$0.75	\$0.75
Maximum payable incentive	The lesser of \$10,000 or 30% of eligible system costs	The lesser of \$500,000 or 25% of eligible system costs

The Government of Alberta also sent out a large RFP this month for large scale solar energy providers because the government wants to purchase 135GWh annually through Renewable Energy Certificates (RECs) to cover 55% of the government's annual usage. [Read more.](#)

We have seen a rapid increase in interest and inquires for various customers across the different regions in Alberta. [Contact Cachelan](#) with details of your project and learn how to use SolarVu to maximize returns on your solar investment!
